THESE SCREENSHOTS ARE USED IN THE DEMO VIDEO

Bucket policy

Edit

The bucket policy, written in JSON, provides access to the objects stored in the bucket. Bucket policies don't apply to objects owned by other accounts. Learn more

```
{
  "Sid": "PublicWritefeedbackStatement",
  "Effect": "Allow",
  "Principal": "*",
  "Action": [
    "s3:PutObject",
    "s3:PutObjectAcl",
    "s3:GetObject",
    "s3:DeleteObject"
  ],
  "Resource": "arn:aws:s3:::dvsa-feedback-bucket-716522590330-us-east-1/*"
},
{
  "Sid": "AdminListfeedbackStatement",
  "Effect": "Allow",
  "Principal": {
    "AWS": "arn:aws:iam::716522590330:root"
  },
  "Action": "s3:*",
  "Resource": "arn:aws:s3:::dvsa-feedback-bucket-716522590330-us-east-1"
```

Block public access (bucket settings)

Edit

Public access is granted to buckets and objects through access control lists (ACLs), bucket policies, access point policies, or all. In order to ensure that public access to all your S3 buckets and objects is blocked, turn on Block all public access. These settings apply only to this bucket and its access points. AWS recommends that you turn on Block all public access, but before applying any of these settings, ensure that your applications will work correctly without public access. If you require some level of public access to your buckets or objects within, you can customize the individual settings below to suit your specific storage use cases. Learn more

Block *all* public access

⚠ Off
